**Amendment A**

Assistant Commissioner for patents  
Washington, District of Columbia 20231

Sir:

In response to the office action mailed 2005 June 22, please amend the above application as follows:

**Specification:**

Page 17, last paragraph, replace with the following paragraph:

Instrumentation on the compression equipment can be used to determine compression on the fiber. Instrumentation also makes it easier to vary the fiber compression in different parts of the process so as to regulate compressive strength and insulation value. It may be desirable to increase fiber density near the bottom of a wall in order to minimize structural compression. By the same token, fiber may be compressed less dense higher in a wall to enhance insulation value.
